Volume XXI

High School is
pursuit of knowledge
understanding
the answer to "Who am I?"
a one way street called Success . . . .
for a few
for others . . . .

High School is
education with a capital "e"
almost an institution in itself
to enlighten
and inform
to point out weakness and strength . . . .
inwardly and outwardly . . . .
the yardstick by which
a student improves himself
and tries
to improve others . . . .

High School is
bubbling enthusiasm
for a winning team . . . .
otherwise . . . .
disappointing apathy
lack of support
deadened spirit . . . .
Sparked suddenly
by a "State Championship"
for a fleeting moment
but then . . . .

High School is
more organizations than
students can handle
designed to give seniors
small rewards for
hours spent
meeting deadlines
committee meetings
earning pins
Working toward the ultimate goal . . . .

ADVERTISEMENTS
111

High School is
The Senior class
weary from learning
facts
figures
formulas . . . .
Yet eager
to kindle a fire
out there . . . .

High School is
A leaving but not departing
A coming but never returning . . . .
Twisting a student's thoughts
giving him direction
A realization that
the more a student
learns
the less he
knows . . . .

High School is
Breathless anticipation of
that special night
Last minute planning
buying of flowers
rustle of formals
in a dimly lit room
Or merely a short record hop
after a home game
An evening destined to end . . . .
too soon . . . .

High School is
A lasting memory of
education and
understanding
anticipation and
enthusiasm
Coupled with
determination
and desire . . . .
The memory that goes on, and on,
and on . . . .

ALMA MATER

Winifred Dearth Stokes

When the sun bends low its ra-diance While the storm clouds roll
Nor-ton High we'll al-ways love you You in-spire our soul.
Al-ma Ma-ter, Al-ma Ma-ter, Sing from pole to pole
Hear our song so clear-ly ring-ing Till we reach our goal
Walk-ing with the stride of hon-or To the road a- head
Nor-ton High we will sa-lute you With our white and red
Al-ma Ma-ter, Al-ma Ma-ter, Sing from pole to pole
Hear our song so Clear-ly ring-ing Till we reach our goal.

Welding by the plasma arc method is a promising development of the B&W Boiler division.

HIS EYE IS ON THE FUTURE. IS YOURS?

Target dates for the men in research are often a decade or more ahead. Whether the project is a new automobile design, a novel chemical formula, or a revolutionary welding process, today's effort is tied to tomorrow's timetable.

That's the way it should be for this June's graduates. This year's decisions ought to be made with the future in mind.

Going on to college? What kind of degree will you work for? How does the course you'll take dovetail with your ability and aptitude? Will it provide the keys you need for the career you really want? Will it start you right toward the goals you've set for yourself?

Going to start work right away? Is it just a job you're looking for? Or do you want to find a line of work that you can build into a career? Ask yourself where the job you take will lead to. Will it enable you to become a truly useful and productive member of society? And will it eventually let you give your family a full measure of the things Americans enjoy?

One thing is certain. You have a better chance of finding the right career or the right job in America than you would anywhere else. Right here in the Barberton-Norton area companies like Babcock & Wilcox provide employment opportunities that are unmatched the world over. Why not see for yourself what American business and industry has to offer you right close to home?
